Coinomi provides a secure storage platform with support for a variety of digital assets and an integrated exchange for quick and easy trading. The Coinomi Wallet combines strong encryption technology with an easy-to-use design that is easy to install and navigate. Some of the main features of the Coinomi wallet are: multi-coin support. Support for hundreds of different digital currencies, including most major cryptocurrencies and many altcoinsSimple setup. Download, install and create a new wallet with just a few clicksEasy Asset Trading. Trade directly from your wallet with an integrated currency exchange privacy first. Emphasis on individual privacy and user controltranslations available. Supports many different languages, including English, Russian and ChineseCompatible with:Fees and FeesCoinomi is completely free to use. When you make an outbound transaction, you may be charged a fee that goes to the miners associated with that particular currency. Coinomi itself does not charge transaction fees. What cryptocurrencies can I store? Coinomi is designed as a multi-currency platform. Coinomi not only provides support for Bitcoin, but is also compatible with a variety of altcoins. Support for new coins is added regularly. The currently supported coins can be found here. Some of the currencies which include Coinomi supported:BitcoinAbncoinAsiacoinAuroracoinBataBelacoinBitcoinPlusBlackcoinBritcoinCanadaeCoinCannacoinClamsClubCoinCompcoinDashDefcoinDenariusDigiByteDigitalcoinDogecoinE-coineDRcoinEGuldenEinsteiniumEthereumClassicExpanseFeathercoinFlashcoinGameCreditsGCRcoinGridcoinGuldenHempcoinInsaneInternetbyPeopleXCoinLandcoinLBRYCreditsLinxLitecoinMonacoInMyriadcoinNamecoinNavcoinNeoscionNeuroNovacoinNuBitsNuSharesOKCashParkBytePeercoinPesobitPinkcoinPIVXPOSWPcoinPutincoinReddcoinRichcoinRubycoinShadowcashSmileycoinSolarcoinStratisSyscoinUltimateSecureCashUnobtaniumVergeVertcoinVpcncoinZcashZCoinHow do I add Coinomi currency? Once you have Installed Coinomi on your phone, adding money to your wallet is easy. If you haven't downloaded the app, you can find it in the Google Play Store. How to set up your wallet: Create a new wallet. If Open the app for the first time, select Create New Wallet. Seed phrase. You will receive a unique seed phrase that you want to write down and put in a safe place. If you ever lose your phone, you can use your seed phrase to restore your wallet to another device. Password. Select a password for your account. You use this to log into your wallet. Currency settings. As soon as you Your seed phrase and password secured, you can choose which currencies you want to see displayed in your wallet. You can adjust this at any time when you add new coins to your portfolio. Once you have opened your wallet, you are ready to send and receive payments in one of the cryptocurrencies that Coinomi supports. How to add money to your wallet: Send Supported Currencies. If you already have a cryptocurrency supported by Coinomi, you can simply send your existing money to your Coinomi wallet address. Receive supported currencies. Anyone can send payments to your wallet address. If you don't have a Bitcoin or other cryptocurrency, you may need to buy some before you can start using your Coinomi wallet. Coinomi does not trade directly with fiat currencies, which means that users cannot buy cryptocurrencies directly through the app with a bank account or credit card. Here are a few ways to get started: Get paid by someone else. The easiest way to start using cryptocurrencies is probably that someone will send someone to your Coinomi wallet address. Bitcoin ATMs. If there is a Bitcoin ATM near you, you can use it to convert fiat currency into Bitcoin and send it to your Coinomi address. Online Exchange. Some online cryptocurrency exchanges, such as Coinbase, let users exchange fiat currency for Bitcoin, which can then be sent to your Coinomi wallet and easily traded for other digital currencies. Diversify. Once you have a cryptocurrency in your wallet, it's easy to trade directly from the Coinomi wallet. Coinomi has an ongoing partnership with the popular ShapeShift exchange, which allows wallet users to quickly and easily trade supported currencies directly from the app without disclosing personal information. How can I pay with Coinomi? To make payments with Coinomi, simply select from the list of options, simply select which currency you want to deposit in, enter the recipient's wallet address, and click Send. Coinomi also supports cross-chain payments, a feature that allows you to make a payment directly from your holdings in one of the supported currencies to a payee's Bitcoin wallet without the need for conversion or intermediate steps. How safe is Coinomi? Coinomi uses strong encryption and improved privacy techniques to ensure a high level of security in your wallet. Some of Coinomi's most notable security features include: HD Wallet Coinomi is an HD wallet. The HD stands for Hierarchical Deterministic, which means that it has a special algorithm to create a seed phrase for your account. The seed set appears as a series of seemingly random words, and it acts like a master password to provide an additional layer of security to your account. You should write down your seed phrase and save it safely somewhere, ideally offline. The seed set allows you to restore access to your account when something goes wrong, such as losing your phone or stealing it. Even if someone Your phone, as long as your Coinomi account is password protected and you have your seed phrase, the thief will not be able to access your money and you can restore your account to a new device with the seed phrase. Another feature of HD wallets, including Coinomi, is that they generate a new wallet address for each transaction. This creates a higher level of privacy as it becomes more difficult to link a number of transactions to a single address. IP anonymizationCoinomi also protects your identity by anonymizing IP addresses through their servers. This protects your personal data and transaction details from potential bad actors and tracking technology. Some available source codemaking important parts of the source code available allows everyone to examine the underlying software behind Coinomi and increases community participation in the project. Where can I get the Coinomi wallet? You can download the Coinomi app for Android from Google Play. If you don't have access to the Play Store, it's also possible to download the application directly from the Coinomi website to your device. Pros and consHigh levels of data protection and security. Quick and easy process for trading currencies through integrated integration with ShapeShift exchange. The private keys associated with all your Coinomi wallets are stored only on your personal device. Even if your phone is stolen, no one will be able to access your accounts without your password. Wallet can be fully restored or migrated to a new device using your seed phrase. Cross-chain payments are supported so you can send altcoins directly to Bitcoin addresses without any additional steps. ConsYou cannot buy cryptocurrencies directly with Fiat through the Coinomi app. At the beginning of 2018, Coinomi was only available for Android phones. Some of the Coinom code is open to the public as open source, but parts of it are kept private. What's next for Coinomi? Altcoin support. While Coinomi is developing, support for new coins is added regularly. Compatibility. The creators of Coinomi have announced that iOS and desktop versions of the wallet are in the works and should be available in 2018 or later. Ongoing updates. Regular software updates are released to keep security features up-to-date. Frequently asked questions No. Coinomi emphasizes the privacy of users and does not ask for personal information to use the app. You do not have a Know Your Customer (KYC) policy. No. Coinomi is very light and data usage is minimal. Users do not need to download entire blockchains to use one of the supported currencies. No. The servers of never have access to your password or seed phrase. This means that even if their

servers were hacked, your information and funds would still be safe. However, if you lose your password and seed phrase, you won't be able to restore your wallet. It is strongly recommended that you write down your seed phrase and place it in a safe place Phone.
